Badda, Dhaka, Bangladesh

PROFESSIONAL SUMMARY

Backend engineer with hands-on experience building and maintaining real world operations that serve real users in production. Built and shipped the backend for [americatobd.com](#), a cross-border e-commerce platform handling live transactions across Amazon, eBay, and Walmart since 2025. Comfortable with PostgreSQL, Git-based PR workflows, code reviews, and taking features from spec to deployment. Ready to commit to Laravel and bring strong backend fundamentals from Django and FastAPI.

SKILLS

- **Languages:** Python, SQL, JavaScript (familiar)
- **Frameworks:** Django, Django REST Framework, FastAPI, React
- **Databases:** PostgreSQL (joins, indexes, migrations, query optimization)
- **Tools:** Git, GitHub Actions (CI/CD), Docker, Redis, Celery
- **APIs & Auth:** REST API design, JWT, OAuth2, RBAC, Swagger/Postman
- **Payments:** Stripe, Bkash, SSL Commerz
- **Deployment:** Linux VPS, Nginx, AWS (EC2, S3, VPC, RDS), domain management, server monitoring

EXPERIENCE

Star Innovative Technologies Ltd. | Backend Developer

April 2026 – Present

- Optimized API response times on existing FastAPI backend by profiling slow ORM queries and restructuring PostgreSQL indexes, reducing average endpoint latency from 2s to under 200ms.
- Maintained and extended production REST APIs consumed by web and mobile clients, owning the full cycle from schema migration to deployment.
- Conducted code reviews on PRs and enforced consistent coding standards across the backend team using a main/staging branch workflow.

Join Venture AI | Backend Developer

April 2025 – March 2026

- Designed database schemas and built RESTful APIs and Websocket using Python and Django for three production applications for global market (Scan2Home, Phlebotomy Staffing, Tether Voice Platform).
- Engineered event-driven OTP and notification pipelines using Celery + Redis, handling async task queuing that reliably delivered notifications under load.
- Set up GitHub Actions CI/CD pipelines, reviewed intern PRs before merging to main, and managed production deployments on VPS with server monitoring.

FAARNS | Backend Developer (Remote)

December 2024 – June 2025

- Built the complete backend for [americatobd.com](#), a production e-commerce platform with automated product scraping from Amazon, eBay, Walmart, and Nike; serving real users and processing live transactions.
- Implemented JWT authentication, role-based access control, and integrated Bkash and manual payment for the Bangladeshi market.
- Designed and maintained PostgreSQL database with proper migrations, joins, and indexing to support order management, user accounts, and admin dashboard queries.

PROJECTS

AmericaToBD — Production E-Commerce Platform

americatobd.com (Live)

Django, PostgreSQL, BeautifulSoup4, Playwright, Bkash

- Full-stack e-commerce backend serving real users with live financial transactions since 2025; automated product fetching from 5+ international marketplaces with graceful fallback to manual purchase forms.
- Built admin dashboard for order tracking, user management, and platform monitoring; handled production incidents and maintained uptime.

Scan2Home — Microservices Real Estate Platform

[GitHub](#)

Django, FastAPI, PostgreSQL, Redis, Docker, GitHub Actions CI/CD

- Designed microservices architecture decoupling Django Core API from an isolated FastAPI AI module via internal Docker network; AI module runs offline with enterprise-grade security.
- Automated testing and deployment pipeline with GitHub Actions CI/CD; production-deployed with real user data.

Phlebotomy Staffing App Backend

[GitHub](#)

Django, PostgreSQL, Stripe, Docker, CI/CD

- RESTful backend handling matching, scheduling, and payment orchestration between clinical businesses and phlebotomists.
- Integrated Stripe subscription billing with multi-tier plans, invoice cycles, and split payments; role-based user system with credential verification and scheduling logic.

EDUCATION

B.Sc. in Computer Science & Engineering | *University of Information Technology & Sciences (UITS)*

Dhaka, Bangladesh

CERTIFICATIONS & TRAINING

- **CSE Fundamentals Certificate** – Phitron (Sep 2023 – Mar 2025) *Verify: PHBATCH49574601094*
- **DevOps with AWS Mastery** – Poridhi.io (Apr 2026 – ongoing)

RECOGNITION

- **Best Backend Developer of the Quarter** – Join Venture AI (Nov 2025)
